

## MISSION - VISION - PRINCIPLES

### □ MISSION:

The mission for Women on the Net (WON) is to create a web site that provides a non-hostile, non-threatening, and non-judgmental place where all women may assemble, mature, and nurture in an oasis of feminine wisdom. In addition, Women on the Net shall create a place for all to learn why we love each other, as well as why we hate each other, and to understand all that makes each woman a unique feminine spirit.

### □ VISION:

It is the vision of Women of the Net to create an informative and entertaining website. It will address the concerns of most women, particularly the interests of women of color, so often neglected through Media. Additionally, while fostering a positive image of all women, it is the intent of the organization to provide links to other sites (external resources) and to create an information center (internal resources) on topics most often affecting women, including but not limited to the following: Health Care and Child Development, Adult and Child Education, Career and Employment Opportunities, Feminism and Gender Issues, Beauty and Fashion, Ecology, Business, and the Arts.

### □ PRINCIPLES

Although addressing a variety of adult themes, it is the intention of WON to present materials in a manner that does not violate the moral standards of any community of subscribers or visitors. If a topic is deemed unsuitable for young viewers, the material will be linked to the primary web site and provided with appropriate parental controls or information regarding use of parental controls.
